

Case Study: YooDoo

Qrimp is the easiest way to import, export, collaborate on, and share your information with the world!

Build your ideas with us.
Build your business with us.

Who is Yoodoo?

Yoodoo is a team of 50+ dedicated staff including some of Britain's best writers, business startup training specialists and video producers. Offering their knowledge and advice are more than 85 business experts; and they're adding more all the time.

Fundamental to Business Operations

"We have customised Qrimp for use as a project management and reference tool. Almost all our staff use it, and without it, our operational ability would be severely compromised."

"Qrimp has been a no-brainer"
Nick Saalfeld
Director, Yoodoo

Affordable Scalability

"It would be hard to quantify a time saving... But in financial terms, Qrimp has been a no-brainer. We could never have extended our reach from small to midsize / growth as a company without serious IT investment had it not been for the scalability of Qrimp."

Independent Development

Yoodoo blew us away with their custom project. We built Qrimp to enable customers to create their own applications and Yoodoo exceeded our expectations. We are proud to help them grow and provide for the entrepreneurial community.
